Researchers at UCSF are using games to study how adolescents pay attention and evaluate rewards.

We are looking for healthy adolescent participants for the study. Eligible participants must be –

- Between 12-16 years old.
- Healthy and have no neurological or psychiatric disorders.
- Right handed.

- The study requires up to 9 visits to UCSF, each visit lasting about 2-3 hours. Visits include EEG, fMRI and behavior assessments.
- Participants will also be given an iPad game to play at home over 6 weeks.
- At end of study, you will be compensated at a rate of $15/hour for your total time commitment, up to $600.
